16 Apr 2018		
Departure of partners		

## MEETING

### 14-4-2018

At the beginning, Estia Pieridon Muson (EPM) organized outdoor photography workshops in Dion. It was an opportunity for the transnational Partners to observe not only the methods and techniques of teaching adults but as well the teacher’s approach to adult learners. These workshops were combined with visiting archeological site and museum of Dion.

In general, it was a chance for project participants to participate in demo photo workshops, to meet and talk to the members of Estia Pieridon Muson (i.e. teachers, learners) about teaching and learning process. As well it was an occasion to have a conversions with them about further education possibilities.

Moreover, it was an occasion to familiarize with ancient Greek culture and history of the region as a background of Estia Pieridon Muson activities.

In the late afternoon, an official opening of the meeting was organised.

Estia Pieridon Muson potencial (members, technical facilities, departments) was presented to the Partners.

Then, the project administrative and financial issues were discussed.

The coordinator showed the presentation on the most important current matters.

The schedule of transnational project meetings was approved.

As a next point of the agenda, the concert took place. It was a great opportunity to see the results of educational process for adults which is organised at Estia Pieridon Muson.

### 15-4-2018

Initially each partner presented his organization to the audience.

As well, a brief presentation on the core topics of the project were described to the audience.

Subsequently, the seminar on “Factors determining the creation of active and long-lasting circles of hobbies / interests” was delivered by Nikos Tsardas.

The presentation was a starting point to the exchange of experiences which took place after.

As a next point of the meeting, Prof. Kotzamanidis Christos gave a lecture on “Physical Activities and wellbeing in the elderly people”.

During and after the presentation an interesting discussion took place.

Afterwards project issues were discussed.

Then Aneta mentioned that during the first meeting in Poland all partners presented the educational systems of their country. In the next meetings the following subjects should be presented:

1. Effective ways of motivating adults for learning process
2. Ways of improving the attractiveness of adult education and training
3. Ways of adjusting educational chances to the needs of adults

Especially Estia Pieridon Muson, having lot of members, can be used to examine education for elder people. Islandic partner has experience in training for immigrants/refugees. We should exploit that because all partner countries face an increased number of incoming immigrants/refugees.

The Polish team plan to visit group of people with fewer chances in education, in order to gain experience on the subject. All the collected data will be send accordingly, and a relative toolbox will be created regarding the needs of those adults for training and their capabilities to use new technologies.

Austrian team mentioned that they could send less members in future project’s trip and offered to give four (4) mobilities to other partners.

The 1<sup>st</sup> interim report should be issued by 14 of June. Subjects that should be covered:

1. Dissemination activities
2. Subjects covered by all partners
3. Information about all partners

Then there was a discussion about the dissemination activities of Estia Pieridon Muson in the local society, issues related with the subscription of the members and other relevant financial sources.

Final remarks: next project meeting will be from 27<sup>th</sup> to 28<sup>th</sup> of August 2018 in Austria.

Then, there was time for a feedback.

The participants received the certificate of attendance.

Prepared by: **Michalis Kakanis & Nikos Tsardas**

Host organisation: **Estia Pieridon Muson**
